Big stick, b = 3
0.17 bits per allocation
+162%
Efron's coin, p = 2/3
0.06 bits per allocation
+47%
Adjustable biased coin, a = 2
0.11 bits per allocation
+28%
Maximal procedure, b = 3
0.11 bits per allocation
+22%
Fixed-temperature rule
any temperature
at most 0.1%
0%
50%
100%
150%
Extra mean squared imbalance over the exact optimum, at the same bits per allocation
